Aspiring Project Manager and software engineer experienced in coordinating AI products, backend systems, and go-to-market workflows

EDUCATION

Vellore Institute of Technology (VIT)

Chennai, India

Bachelor of Technology – Computer Science and Engineering — CGPA: 9.09/10

Jun 2024 – May 2028

EXPERIENCE

Current concurrent engagements: product engineering at KGen and research through Samsung PRISM.

Software Development Engineer Intern

Aug 2026 – Present

Kratos Gamers Network (KGen)

Remote

- Developing a prediction market product and scalable backend architecture for market creation, trading, and settlement workflows
- Building leveraged trading APIs, managing database performance and integrity, and leading SEO and Generative Engine Optimization initiatives

Project Intern – Samsung PRISM

Jun 2026 – Present

Samsung R&D Institute India (SRI-B)

Chennai, India

- Improved small language model reasoning accuracy by 15% on logical benchmarks using a quantum-inspired simulated annealing framework
- Built Python NLP pipelines combining transformer models with annealing search and contributed to research publication and intellectual property development

Software Engineering Intern

Jan 2026 – Jun 2026

Cerify.ai

Chennai, India

- Fine-tuned small language models on 10K+ legal and smart contract samples, improving clause classification by 22% and reducing false positives by 18%
- Integrated inference endpoints and secure backend services with blockchain data to support compliant, tamper-resistant auditing workflows

GTM Engineer

Jun 2025 – Dec 2025

Devswarm.ai

Chennai, India

- Automated HubSpot CRM and analytics workflows, reducing manual sales processing time by 40%
- Built lead-scoring and routing pipelines that increased SQL conversion by 25%, cut response time by 2 hours, and generated 50+ pipeline opportunities

PROJECTS

Well-Wise – Pulse Guard | Python, Flask, Streamlit, Scikit-learn, Railway

2025

- Deployed a prediction platform covering 4 medical conditions with 88%+ model accuracy and live confidence scoring
- Added fitness planning and calorie tracking and served 100+ users through a Railway-hosted Streamlit application

RailQ – Neural-Meteorological Infrastructure Manager | Python, TensorFlow, OpenWeatherMap API

2025

- Trained a multi-output attention network that achieved 90% allocation efficiency across 50+ simulated routes
- Integrated live OpenWeatherMap data and achieved 85% robustness under severe-weather simulations

LEADERSHIP & CAMPUS OUTREACH

Campus Ambassador | Chennai, India

Jul 2025 – Dec 2025

TakeUForward (Jul 2025 – Dec 2025): Introduced 50+ students to DSA and competitive programming resources and organized coding workshops at VIT Chennai. **Unstop (Sep 2025 – Dec 2025):** Promoted hackathons and hiring challenges and connected students with career opportunities through targeted campus outreach.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, C, C++, Java, HTML5, CSS3

Frameworks: React.js, Next.js, Node.js, Express.js, Flask, FastAPI, Tailwind CSS, Streamlit

AI / ML: Scikit-learn, TensorFlow, Pandas, NumPy, LangChain, NLP, Deep Neural Networks

Databases & Cloud: Firebase, Supabase, MySQL, MongoDB, Railway, Vercel, GitHub Actions

Developer Tools: Git, GitHub, Docker, Postman, VS Code, Agile, CI/CD

Spoken Languages: English (Professional), Bengali (Native), Hindi (Fluent)
